-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-5 are pending.

Drawings

2. The drawings were received on March 4, 2005. These drawings are not acceptable. The additional subject matter added to the proposed Figure 2 does not have support from the descriptive portion of the specification. Clear support for the proposed additional subject matter must be clearly identified. Applicant's March 4, 2005 REMARKS have been reviewed, but clear support for all material contained therein is not evident.

Specification

3. The amendment filed March 4, 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The proposed two lines beginning on page 6, line 7, does not have support from the original specification. Clear support for the proposed additional subject matter must be clearly identified. Applicant's statement regarding this matter is noted, but not convincing as no clear support for the proposed amendment is evident.

Applicant is required to cancel the new matter in the reply to this Office Action, unless proper support therefore is given.

Also, Applicant's proposed Amendment received January 3, 2005 regarding page 6, lines 6-23 has not been entered. Thus, the specification is still deficient with regards to the specification in juxtaposition with the drawings.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant is directed towards paragraph 4 from the September 29, 2005 Final Rejection. Applicant's March 4, 2005 REMARKS have been reviewed, but are not convincing. No clear support for the material added via the June 18, 2004 Amendment has been demonstrated by Applicant.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-5, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Willis et al, US 5,515,269.

Willis discloses a computer implemented technique, e.g. method, for estimating an expected component surplus, e.g. 87 and identifying a level for each of the components, e.g. 22, 25, using a database comprising cost/price attributes, e.g. claims 27, 30. Willis does not specifically disclose an uncancelable level for each of the components.

However, levels that are not to have been cancelled have been common knowledge in the art. To have provided such for Willis would have been obvious to one of ordinary skill in the art. The motivation for providing such would have been using a known factor in determining a cost/price determination when identifying components used in common knowledge product production.

8. A further pertinent reference of interest is noted on the attached PTO-892.

9. Applicant's Information Disclosure Statement received April 28, 2005 has been reviewed. Note attached PTO-1449.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Joseph Rudy whose telephone number is 571-272-6789. The examiner can normally be reached on Monday thru Friday.
